

United States Senate

COMMITTEE ON FINANCE
WASHINGTON, DC 20516-6200

April 21, 2010

Via Electronic Transmission

Nancy Atkins
Commissioner
West Virginia Bureau for Medical Services
State of West Virginia
350 Capitol Street
Charleston, WV 25301

Dear Commissioner Atkins:

In the United States, the federal and state governments spend roughly \$317 billion every year on the Medicaid program. As Ranking Member of the Senate Committee on Finance, I have an obligation to ensure that taxpayer dollars are appropriately spent on federal health care programs. Like the Medicare program, Medicaid suffers from systemic weaknesses that lead to fraud, waste, and abuse across the program, resulting in higher costs and less health care to those who are in need. The overutilization of prescription drugs, whether through drug abuse or outright fraud, plays a significant role in the rising cost of our healthcare system. The purpose of this letter is to request information regarding certain outliers in West Virginia's Medicaid program and what steps West Virginia takes to monitor rates of utilization.

In recent inquiries, I have asked the U.S. Department of Health and Human Services about physicians prescribing mental health drugs at astonishingly high rates. In addition to these concerns, a recent CNN report detailed the increasing abuse of OxyContin, Roxicodone, and Xanax. Specifically, the report described the role some pain management clinics and physicians play in the black market for these drugs. I write today to better ascertain how high rates of both mental health and pain medication utilization are affecting the Medicaid program, as well as how West Virginia's rates compare to the national rates.

To that end, please provide charts that list of the top ten Medicaid prescribers of the following drugs for the years 2008 and 2009. For each prescriber, please provide his/her prescriber identifier, and the number of prescriptions written per drug per year, and the total amount billed to Medicaid per drug, separated for each year.

- Abilify;
- Geodon;
- Seroquel;
- Zyprexa;

- Risperdal;
- OxyContin;
- Roxicodone; and
- Xanax.

I thank you in advance for your cooperation and request that you provide the requested documents and written responses by no later than May 5, 2010. In your reply, please format information into a chart like the examples provided below. All formal correspondence should be sent electronically in PDF format to Brian_Downey@finance-rep.senate.gov or via facsimile to (202) 228-2131. Of course should you wish to discuss this matter further, please do not hesitate to contact Christopher Armstrong of my Committee staff at (202) 224-4515.

Sincerely,

A handwritten signature in black ink that reads "Chuck Grassley". The signature is written in a cursive, slightly slanted style.

Charles E. Grassley
Ranking Member

The Honorable Charles E. Grassley
United State Senate
135 Hart Senate Office Building
Washington, DC 20510

Dear Senator Grassley:

This letter is written in response to your April 21, 2010, letter requesting that West Virginia Medicaid identify and report the top ten Medicaid prescribers of certain drugs. I, along with my staff, appreciate the fact that overutilization of prescription drugs contributes to the rising cost of Medicaid expenditures and inappropriate use of these agents can have devastating societal consequences. In order to minimize these negative effects, the Bureau for Medical Services, the sole state agency for Medicaid services in West Virginia, in conjunction with the federally mandated Drug Utilization Review and Retrospective Drug Utilization Review programs, works to educate prescribers and pharmacy providers when overutilization occurs or is suspected. Pharmacy claims are processed using a state-of-the-art system which recognizes and denies claims that are identified as duplications, excesses of evidence-based limitations, early refills, etc., in order to eliminate or reduce overutilization. In addition, over-utilizing members are placed in the pharmacy lock-in program which limits their access to one pharmacy provider for their Medicaid-covered drugs. In total, West Virginia Medicaid has been very successful in preventing and reducing overutilization of prescription drugs with resulting reduction in federal and state expenditures.

Enclosed, please find the information you requested. In order to preserve the integrity of our Medicaid providers and assure the continuation of provider participation for this vulnerable population, I respectfully request that the information be kept confidential. The release of information which specifically identifies physicians may result in unintended consequences for those physicians who provide medically necessary services while assuring quality of care within their specialties. With the current situation in our state, any loss of provider enrollment, particularly specialists, will negatively impact access to care for our members. Moreover, we already monitor the quality and integrity of our programs to help ensure proper utilization of Medicaid-paid services and a fair hearing for Medicaid providers.

Please feel free to telephone me at 304-558-1700 should you wish to discuss the West Virginia Medicaid prescriber data while we work together to combat waste, fraud, and abuse of the Medicaid Program.

Sincerely,

Nancy Y. Atkins, RN, MSN, NP-BC
Commissioner
